

Major Route Points

A quick driver study guide for explaining where each Route Trainer route travels.

Use these as route-overview talking points. They are not a replacement for the current operator sheet, detour instructions, or a live navigation decision.

How to use this guide

Each route is reduced to eight memorable movement points: terminal, main corridor, important turn or area, and destination. For routes with different patterns in each direction, use the current schedule and operator sheet to confirm the exact variation.

3

North 40th / South 42nd
